

PROFESSIONAL SUMMARY

Final-year Information Technology student with 6 months of hands-on Business Analyst internship experience at TMA Solutions and practical experience in Software Testing & Quality Assurance. Skilled in requirements analysis, test case design, manual functional testing, bug reporting, retesting, fix verification, and web/e-commerce validation, with basic experience using Postman, Selenium WebDriver, SQL, and Jira. Designed a comprehensive 30-test-case suite for the TNC Store e-commerce web application, covering functional, UI, business-logic, calculation, persistence, and data-integrity scenarios. Seeking to develop as a Manual QA Engineer in an international digital-commerce environment by combining strong requirement understanding, analytical thinking, attention to detail, and a quality-focused mindset.

PROFESSIONAL EXPERIENCE

TMA SOLUTIONS BUSINESS ANALYST INTERN	03/2026 – 08/2026
- Analysed and clarified software requirements, User Stories, Acceptance Criteria, Business Rules, user/system flows, and expected system behaviour, establishing a clear functional baseline for development and quality validation. - Supported manual functional testing and UAT by validating implemented features against documented requirements and Acceptance Criteria, identifying functional discrepancies and communicating expected behaviour. - Reported and followed up on identified issues, collaborated with Developers and QA Engineers during clarification, and performed retesting and fix verification after corrective actions were implemented. - Analysed business and system flows, alternative paths, permission conditions, exceptions, workflow gaps, and edge cases to identify quality risks and additional testing scenarios. - Collaborated with Product Managers, Business Analysts, Developers, UI/UX Designers, and QA Engineers throughout the Software Development Life Cycle (SDLC) to support requirement clarification, issue resolution, testing activities, and product quality.	

SOFTWARE TESTING PROJECT

TNC Store Web Application – Software Testing & Quality Assurance	09/2025 – 12/2025
- Designed and documented a comprehensive 30-test-case suite for an e-commerce web application, covering authentication, shopping cart, sorting/filtering, form validation, product reviews, pricing and discount logic, PC Builder workflows, session persistence, and data integrity. - Designed and executed positive, negative, functional, validation, and edge-case scenarios, maintaining structured test documentation with test steps, expected results, actual results, and Pass/Fail/Skip outcomes. - Performed UI, business-logic, calculation, and data validation across key digital-commerce workflows, including cart calculations, quantity limits, discounts, search/filter behaviour, user inputs, cross-page persistence, and product-data consistency. - Used Selenium WebDriver to automate selected web testing scenarios involving dynamic UI elements, search/filter behaviour, calculations, product configuration, session persistence, and data consistency.	

TECHNICAL SKILLS

Manual Testing & QA: Requirement Analysis, Test Scenario Design, Test Case Design, Test Documentation, Manual Functional Testing, Positive/Negative Testing, Regression Testing Fundamentals, UAT, Bug Reporting, Retesting, Fix Verification, Bug Lifecycle Fundamentals
Web & E-commerce Testing: Web Application Testing, E-commerce Testing, UI Validation, Input Validation, Business Logic Validation, Calculation Validation, Search & Filter Validation, Session Persistence Testing, Data Integrity Validation, Edge Case Analysis
API & Data: Postman – Basic API Testing, Request/Response Validation, HTTP Methods & Status Code Fundamentals, SQL – Basic Queries
Test Automation: Selenium WebDriver – Basic Web Test Automation, Katalon Studio – Basic Familiarity
Tools & Methodologies: Jira, Microsoft Excel, SDLC, Agile/Scrum
Professional Skills: Analytical Thinking, Attention to Detail, Logical Thinking, Communication, Teamwork, Proactive Learning
Languages: Vietnamese – Native English – Working Proficiency

EDUCATION

HO CHI MINH CITY UNIVERSITY OF TECHNOLOGY BACHELOR OF ENGINEERING IN INFORMATION TECHNOLOGY	2022 – 2026
- GPA 3.4/4.0. - Distinction Student Award (Academic Years 2022–2023 & 2023–2024).
